EDUCATION

Poddar Management and Technical Campus
Master of Computer Applications (MCA) – AI/ML

Jaipur, Rajasthan
Aug 2024 – Jan 2026

Singhania University
Bachelor of Computer Applications (BCA)

Jhunjhunu, Rajasthan
May 2020 – Jul 2023

TECHNICAL SKILLS

Languages: Python, SQL (PostgreSQL), TypeScript
AI/ML & RAG: pgvector, BM25, Cross-Encoders, Semantic Search, Zero-Shot Classification, NLP pipelines
Frameworks & APIs: FastAPI, Next.js, React, Node.js, Scikit-learn, LightGBM
MLOps & Infrastructure: Docker, GitHub Actions (CI/CD), Redis, Server-Sent Events (SSE)

HONORS & HACKATHONS

Google "Fund My Crazy Idea" 2.0 – Top 50 National Finalist

Sep 2026

- Selected in the top 50 nationwide for the **AeroBaori OS** project.
- Deployed a Baori-Parasol skill, developing comprehensive system architecture diagrams and visual storyboards.

India Runs Hackathon (Hack2Skill & RedRob AI) – Solo Finalist

Sep 2026

- Reached the finalist stage by engineering the **RedRob Ranker** candidate evaluation engine.
- Implemented semantic similarity embeddings and reproducible evaluation harnesses to automate candidate ranking.

WORK EXPERIENCE

Celebal Technologies
Data Science Intern

Jaipur, India
May 2025 – Jul 2025

- Developed and deployed a high-performance NLP classification model utilizing Python and Scikit-learn, achieving 90% inference accuracy.
- Engineered a fully automated topic modeling pipeline using LDA, TF-IDF, and K-Means clustering to extract critical failure modes and latent themes from unstructured datasets.
- Reduced manual triage and data resolution time by 40% through direct workflow automation and predictive modeling.

TaskUs, Concentrix, Urban Company
Customer Experience Operations

Gurugram, India
Feb 2020 – Sep 2023

- Managed tier-1 escalations and high-volume customer inquiries across international portfolios.
- Consistently maintained a 95%+ CSAT rating and exceeded baseline SLA targets for first-contact resolution.

ENGINEERING PROJECTS

Customer Inquiry Intent Classifier | *FastAPI, Docker, CI/CD, NLP*

- Architected a 7-class real-time intent classification engine achieving 93%+ macro F1 on noisy, unstructured text inputs.
- Packaged the inference engine as a high-throughput FastAPI microservice, containerized via multi-stage Docker builds.
- Enforced zero-downtime deployment and code stability via GitHub Actions CI/CD with 100% test coverage (18/18 tests passing).

Trace RAG System | *pgvector, BM25, Cross-Encoders, FastAPI*

- Engineered a production RAG pipeline utilizing hybrid retrieval (pgvector dense embeddings + BM25 sparse lexical search) for video transcripts.
- Integrated cross-encoder reranking to optimize precision-at-k, reducing end-to-end retrieval latency to sub-15ms for streaming contexts.
